1. Project Overview

The Sales Analysis Dashboard is an Excel-based data analysis project designed to understand sales performance, product demand, customer behavior, delivery performance, and occasion-wise revenue. The project uses related Product, Order, and Customer datasets and presents the results through Pivot Tables, charts, KPI cards, and interactive slicers.

The project follows a practical data analyst workflow: raw data is organized and validated, relevant fields are calculated, the data is summarized using Pivot Tables, and the resulting analysis is presented in an interactive dashboard.

2. Project Objectives

- Analyze total sales revenue and order performance.
- Measure average delivery time between order and delivery.
- Identify monthly and weekday revenue trends.
- Identify top-performing products and categories.
- Analyze customer spending and city-wise order activity.
- Compare revenue across different occasions.
- Study whether order quantity has a meaningful relationship with delivery time.
- Identify the most popular products for different occasions.
- Present the analysis in an interactive Excel dashboard.

3. Dataset Description

The Excel workbook contains five main worksheets: Product, Order, Customer, Sheet1, and Dash Board. The Product, Order, and Customer sheets provide the source data, while Sheet1 contains analysis calculations and the Dash Board sheet presents the final visualization.

Dataset	Records in workbook	Main fields / purpose
Product	70 products	Product ID, Product Name, Category, Price, Occasion, Description
Order	1,000 orders	Order/Delivery information, Location, Occasion, Quantity, Revenue, delivery duration
Customer	100 customers	Customer ID, Name, City, Gender and customer details
Sheet1	Analysis sheet	Pivot Tables and helper calculations
Dash Board	Dashboard	KPIs, charts and interactive slicers

3.1 Product Dataset

The Product dataset provides the master information needed to identify products, their categories, prices, and associated occasions. Product_ID is used to connect products with order transactions.

Product_ID	Product Name	Category	Price (INR)	Occasion	Description
1	Magnam Set	Soft Toys	1935	All Occasions	Quam numquam iste sunt nemo.
2	Voluptas Box	Plants	441	Valentine's Day	At quaerat animi nemo.
3	Eius Gift	Colors	1534	Valentine's Day	Deserunt pariatur mollitia voluptatem.
4	Accusantium Set	Sweets	1199	Diwali	Corporis odio consequatur perferendis repellendus laudantium deserunt.
5	Natus Gift	Colors	1444	All Occasions	Quis occaecati reprehenderit facere tenetur illum exercitationem.
6	Quos Box	Cake	1112	Holi	Eum deleniti adipisci vero neque.
7	Quos Set	Soft Toys	409	Holi	Sint accusamus veritatis exercitationem corporis.
8	Qui Box	Sweets	252	Anniversary	Praesentium necessitatibus quos esse neque.
9	Aperiam Box	Colors	1605	Raksha Bandhan	Explicabo totam quaerat a quaerat ducimus officia.
10	Accusantium Gift	Cake	259	Birthday	Minima nobis repellendus distincto a veritatis voluptate eaque.
11	Maxime Set	Colors	1096	Valentine's Day	Sapiente exercitationem illo sed ea.
12	Non Set	Plants	672	Anniversary	Fugiat id similique minima corrupti ut sint sapiente.
13	Et Set	Mugs	1141	Holi	Eius praesentium ipsum autem.
14	Deserunt Box	Colors	1915	Birthday	Incidunt hic vero esse saepe illum.
15	Repudiandae Box	Raksha Bandhan	1488	Anniversary	Consequuntur placeat quia voluptate esse consectetur accusamus nemo.
16	Ut Pack	Sweets	1721	Holi	Quae occaecati laborum expedita perspiciatis consequatur ad.
17	Delectus Gift	Soft Toys	1899	Anniversary	Architecto beatae ullam ad sed dolore voluptates est.
18	Nemo Set	Plants	781	Birthday	Perspiciatis nemo dolore perspiciatis aspernatur.
19	Iure Gift	Mugs	1234	Valentine's Day	Autem quaerat tempore quasi ipsam.
20	Reiciendis Box	Colors	697	Anniversary	Molestias eorum quam dolor.
21	Quia Gift	Colors	1561	Raksha Bandhan	Autem necessitatibus perferendis consequatur suscipit iste harum sint.
22	Exercitationem Pack	Soft Toys	1639	All Occasions	Iusto cum nostrum quasi dicta totam error.
23	Dignissimos Pack	Sweets	1098	Anniversary	Sunt laborum incididunt ad asperiores itaque minus placeat.
24	Ad Box	Mugs	535	Birthday	Possimus perspiciatis nesciunt modi molestias.
25	Qui Gift	Plants	1202	Anniversary	Maxime culpa eorum blanditis.
26	Aliquam Box	Colors	289	Holi	Sunt repellendus quidem laborum provident voluptas ut nisi.
27	Architecto Gift	Cake	548	Raksha Bandhan	Odio quisquam inventore esse sed recusandae autem.
28	Velit Set	Sweets	1778	Raksha Bandhan	Quidem sit facilis consequuntur iusto dignissimos exercitationem.
29	In Set	Colors	1252	Holi	Occaecati impedit incididunt qui.
30	Deserunt Box	Colors	744	Anniversary	Maiores exceptatibus mollitia voluptate dolorem.

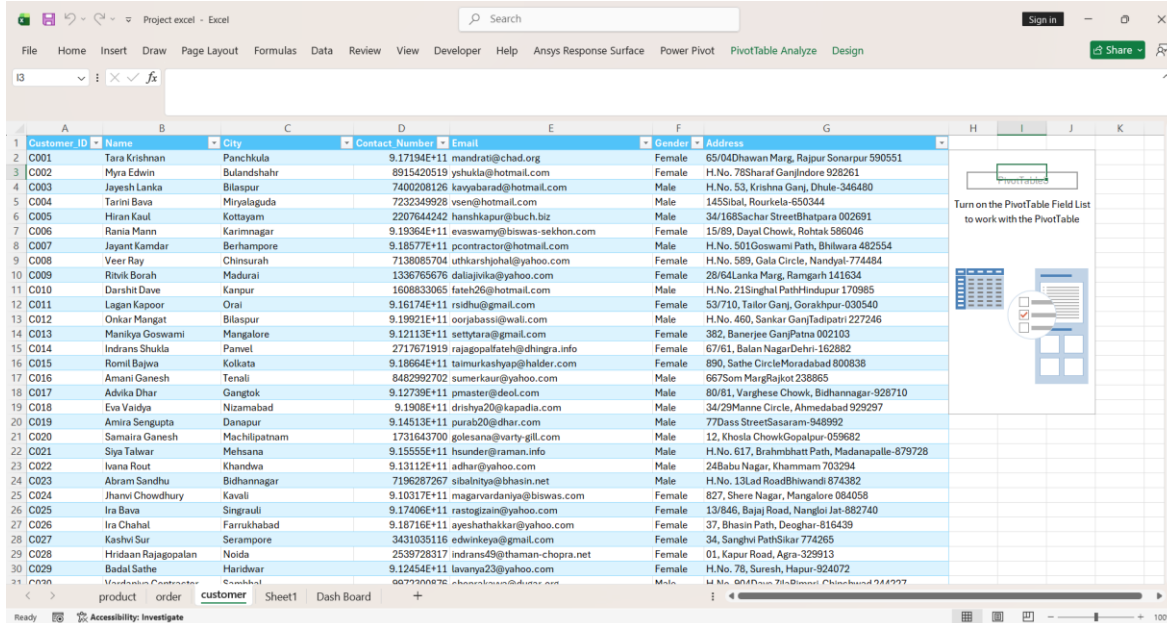

3.2 Order Dataset

The Order dataset contains the transaction and delivery information used for revenue, monthly, weekday, occasion, location, quantity, and delivery-time analysis.

Delivery Date	Delivery Time	Location	Occasion	Month Name	Del-ord date	Day Name (Order Date)	Revenue	Days dl-ord	Price (INR)
05-03-2023	07:27:10	Bardhaman	Anniversary	February	9 Friday	9 Friday	₹ 6,870.00	9	₹ 1,374.00
19-07-2023	17:39:00	Bilaspur	Anniversary	July	5 Friday	5 Friday	₹ 6,870.00	5	₹ 1,374.00

3.3 Customer Dataset

The Customer dataset provides customer-level information. For this report, analytical fields such as Customer_ID, City, and Gender are relevant. Personal-looking contact, email, and full address fields should not be displayed in the final submitted report.

Customer_ID	Name	City	Contact Number	Email	Gender	Address
C001	Tara Krishnan	Panchkula	9.17194E+11	mandrati@chad.org	Female	65/04Dhawana Marg, Rajpur Sonarpur 590551

4. Data Preparation and Validation

The data was reviewed before analysis to ensure that the fields required for the dashboard were available and consistent. The analysis uses calculated revenue, delivery duration, month name, and weekday fields.

- Revenue was analyzed at order level and connected to product information through Product_ID.
- Delivery duration was calculated from Delivery Date minus Order Date.
- Month Name was used for monthly revenue analysis.
- Day Name was used for weekday revenue analysis.
- Product_ID and Customer_ID provide relationships between the related datasets.
- Duplicate Order IDs were checked and no duplicate Order IDs were found.
- No missing values were identified in the Order sheet used for the main analysis.
- Revenue values were checked against Quantity × Price.

5. Analysis Methodology

Pivot Tables were used to aggregate revenue, orders, product performance, category performance, city activity, and occasion performance. Pivot Charts were then used to convert these summaries into visualizations. Slicers were added to allow the dashboard to be filtered interactively.

6. Key Performance Indicators

KPI	Result
Total Orders	1,000
Total Revenue	₹35,20,984
Total Quantity Sold	3,045 units
Average Order Value	₹3,520.98
Average Delivery Time	5.53 days
Minimum Delivery Time	1 day
Maximum Delivery Time	10 days

Note: ₹3,520.98 is Total Revenue divided by 1,000 orders, so it is more accurately described as Average Order Value rather than Average Customer Spending.

7. Sales and Revenue Analysis

7.1 Monthly Revenue Performance

Month	Revenue
August	₹7,37,389
February	₹7,04,509
March	₹5,11,823
November	₹4,49,169
June	₹1,57,913
October	₹1,51,619
May	₹1,50,346
December	₹1,49,591
April	₹1,40,393
September	₹1,36,938
July	₹1,35,826
January	₹95,468

August recorded the highest monthly revenue at ₹7,37,389, while January recorded the lowest at ₹95,468.

7.2 Weekday Revenue

Day	Revenue
Tuesday	₹6,77,223
Sunday	₹6,28,138
Friday	₹4,75,447
Monday	₹4,61,670
Saturday	₹4,44,960
Thursday	₹4,18,354
Wednesday	₹4,15,192

Tuesday generated the highest weekday revenue at ₹6,77,223.

8. Product and Category Analysis

8.1 Category Revenue

Category	Revenue
Colors	₹10,05,645
Soft Toys	₹7,40,831
Sweets	₹7,33,842
Cake	₹3,29,862
Raksha Bandhan	₹2,97,372
Plants	₹2,12,281
Mugs	₹2,01,151

Colors was the highest-revenue category, generating ₹10,05,645.

8.2 Top Products by Revenue

Rank	Product	Revenue
1	Magnam Set	₹1,21,905
2	Dolores Gift	₹1,06,624
3	Harum Pack	₹1,01,556
4	Deserunt Box	₹97,665
5	Nostrum Box	₹97,656

Magnam Set was the highest-revenue product at ₹1,21,905.

9. Customer and City Analysis

9.1 Customer Spending

The complete workbook contains 100 customers. Total revenue of ₹35,20,984 across 1,000 orders gives an average order value of ₹3,520.98. When revenue is aggregated by customer, the average total customer spend during the analysis period is ₹35,209.84.

The highest-spending customer in the analyzed workbook generated ₹75,029 in revenue from 16 orders.

9.2 Top Cities by Number of Orders

Rank	City	Orders
1	Ghaziabad	9
2	Bareilly	9
3	Bhilai	8
4	Darbhanga	7
5	Sirsa	7
6	Bulandshahr	7
7	Ozhukarai	7
8	Varanasi	7
9	Alwar	7
10	Satara	7

These rankings are based on the complete 1,000-order dataset. The city analysis should use the order count rather than a sum of product prices.

10. Delivery Time Analysis

The average delivery duration is 5.53 days, with individual order delivery durations ranging from 1 to 10 days.

Quantity	Average Delivery Time
1	5.54 days
2	5.38 days
3	5.83 days
4	5.25 days
5	5.63 days

The correlation between order quantity and delivery time is approximately 0.0035, indicating essentially no meaningful linear relationship in this dataset. Larger quantities therefore did not consistently result in longer delivery times.

11. Occasion Analysis

Occasion	Revenue
Anniversary	₹6,74,634
Raksha Bandhan	₹6,31,585
All Occasions	₹5,86,176
Holi	₹5,74,682
Birthday	₹4,08,194
Valentine's Day	₹3,31,930
Diwali	₹3,13,783

Anniversary generated the highest occasion-wise revenue at ₹6,74,634.

11.1 Most Popular Product by Occasion

Occasion	Top Product	Revenue
All Occasions	Magnam Set	₹1,21,905
Raksha Bandhan	Dolores Gift	₹1,06,624
Holi	Harum Pack	₹1,01,556
Birthday	Deserunt Box	₹97,665
Anniversary	Dignissimos Pack	₹90,036
Valentine's Day	Eius Gift	₹85,904
Diwali	Aut Box	₹81,057

12. Dashboard Overview

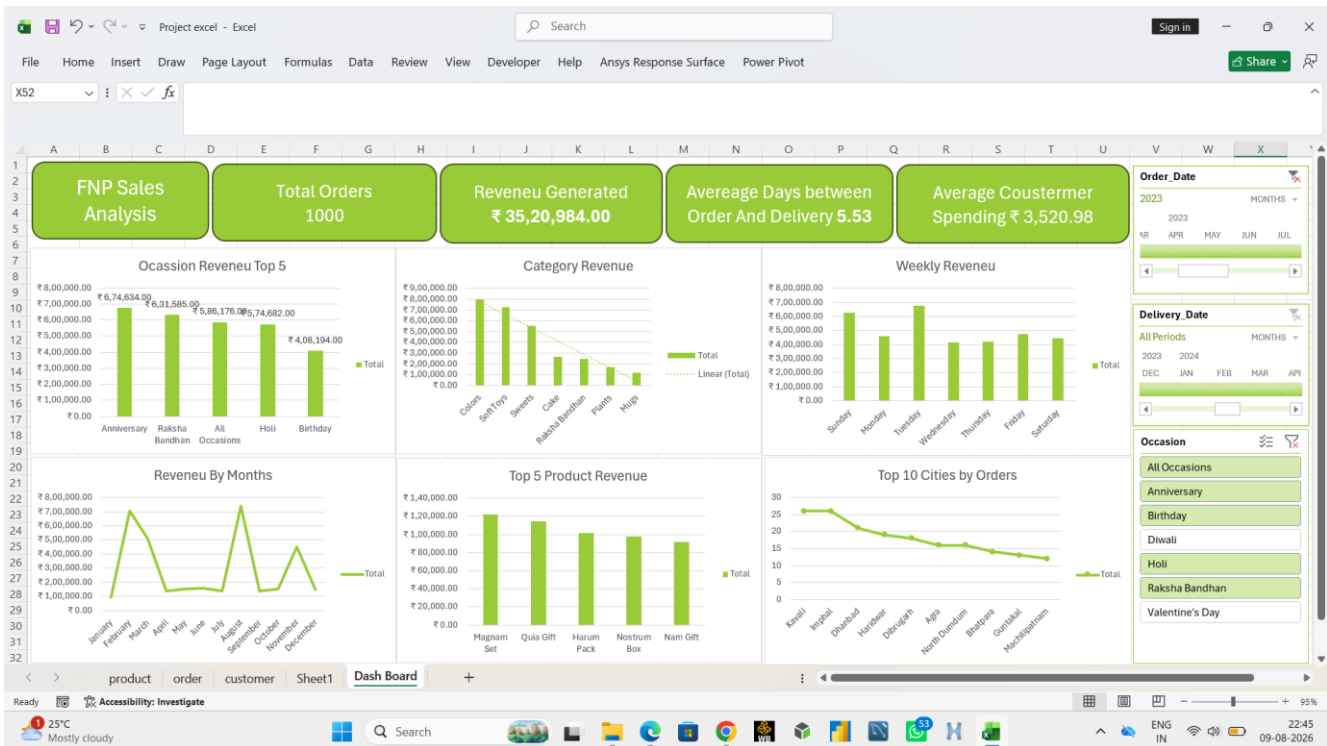

The final Excel dashboard combines KPI cards, charts, and slicers into a single interactive view. The dashboard is designed to allow users to quickly monitor overall performance and filter the analysis by Order Date, Delivery Date, and Occasion.

12.1 Dashboard Components

- Total Orders KPI
- Total Revenue KPI
- Average Delivery Time KPI
- Average Order Value KPI
- Occasion Revenue chart
- Category Revenue chart
- Weekly Revenue chart
- Monthly Revenue chart
- Top Product Revenue chart
- Top 10 Cities by Orders chart
- Order Date, Delivery Date, and Occasion slicers

12.2 Excel Analysis / Pivot Tables

The analysis worksheet contains the supporting Pivot Tables and calculations used to build the dashboard.

13. Key Business Insights

- Total revenue for the analyzed 1,000 orders was ₹35,20,984.
- August was the strongest month with ₹7,37,389 in revenue.
- Anniversary was the highest-revenue occasion with ₹6,74,634.
- Colors was the highest-revenue category with ₹10,05,645.
- Magnum Set was the highest-revenue product with ₹1,21,905.
- Tuesday generated the highest weekday revenue at ₹6,77,223.
- The average delivery duration was 5.53 days.
- There was almost no measurable relationship between order quantity and delivery time.
- The city analysis shows Ghaziabad and Bareilly with the highest order count at 9 orders each.

14. Conclusion

This project demonstrates how Microsoft Excel can be used to transform structured sales data into actionable business insights. The combination of related datasets, calculated fields, Pivot Tables, Pivot Charts, KPI cards, and slicers provides a practical workflow for sales analysis and dashboard development.

The final dashboard makes it easier to monitor revenue, product performance, customer and city activity, delivery efficiency, and occasion-based demand. The project also demonstrates the importance of validating calculations and choosing accurate labels for KPIs before presenting analysis to stakeholders.

15. Future Improvements

- Add profit and profit-margin analysis.
- Add customer segmentation based on spending and purchase frequency.
- Add regional sales analysis.
- Add sales forecasting.
- Use Power Query for automated data cleaning and transformation.
- Use Power Pivot and a formal data model for larger datasets.
- Recreate the dashboard in Power BI for advanced interactivity and sharing.

16. Tools Used

Microsoft Excel

Main Excel features: Pivot Tables, Pivot Charts, Slicers, formulas, conditional formatting, data validation, and dashboard design.
